Room 3 Week 7 Term 3 31 August - 6 September 2010

What a busy week last week. Well done to our class finalists for speeches, Isabella, Michael, MacKenzie and Jack. Isabella, Michael and MacKenzie have made it through to the school finals on Wednesday evening. Hope to see you there.

Friday afternoon we are having Friday Club, to reward the students who have worked hard over the week to learn and be good Bumper Kids. Students are offered a variety of activities they have chosen as a syndicate.

Kelly Gaston

You now have a choice of work tasks each week. Some will be COMPULSORY, shown by a * and others you can choose. COLOUR the grids you have worked on and get your parents to SIGN each grid once it is completed. This week you will need to have complete at least 5 tasks

Art: Create a piece of art. Drawing, Pottery, Craft, Painting, Sewing etc	* Read every night. Fiction, Newspapers, Magazines, poetry, Factual Books, Comics, Poetry etc	*Practice your basic facts eg. division, multiplication, addition and subtraction.
Physical activity, sports, training or sport. eg bike riding, Swimming, Fishing, Walking the Dog	Play a game with an Adult, eg Yahtzee, Outdoor games, scrabble, board games.	Spelling: Find as many words with the long o sound. Write them in your Home workbook.
Play a musical instrument or listen to a new type of music you don't normally listen too.	Choose 6 words from your reading book that you are unsure of. Find their meaning, and write them in your homework book.	Do the maths worksheet.
Do the daily Current Events sheet. Handed out during week 3 and 4 homework	Help with housework	FREE CHOICE Do one activity that your parents agree can be signed off for homework.

EXTRA FOR THOSE WHO WOULD LIKE TO DO IT.

This week we focus on Animals. Animals come in many shapes and sizes, and they live throughout the world. Some animals walk or crawl on land or dig through the soil. Others swim in the water or fly through the air. Some animals even live inside the bodies of other animals.

No one knows exactly how many kinds of animal there are. New species are found every year. So far, scientists have identified more than 1.5 million kinds of animals. About 1 million of these are insects

Create a poster, or pamphlet on an insect that interests you. Include pictures and facts. Must be quality work.
